

# WebSentry Technology

Real-Time Monitoring  
Real Peace of Mind

24 hours a day

7 days a week

## WebSentry Remote Monitoring

Our ongoing **WebSentry** monitoring service redefines the concept of factory service and support by remotely tracking all the critical functions of your dehumidifier 24/7 – in real time.

Stored securely on our central server, all daily performance metrics of your dehumidifier are captured and analyzed using complex computer algorithms. Should anomalies of any nature arise, the system will automatically generate notifications by email to specified emergency contacts, including your service and maintenance personnel. A Dectron factory-trained technician can also be contacted for additional support.

## WebSentry Truly is a Game Changer

Through a simple Ethernet connection (Wi-Fi and cellular network options also available), this incredible innovation allows factory engineers to remotely monitor, analyze, fine-tune or troubleshoot over 100 critical dehumidifier functions via the Internet to deliver truly exceptional product performance and reliability.

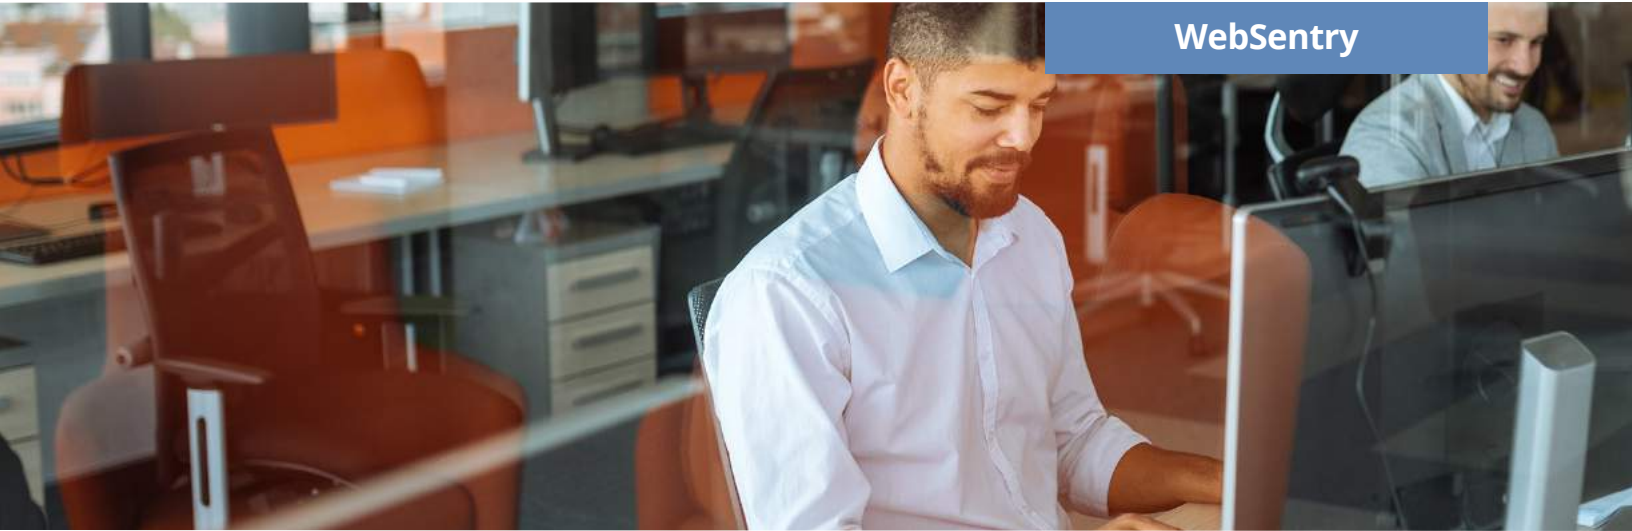

**WebSentry** is Dectron's revolutionary approach to ensuring peak dehumidifier performance and the absolute lowest overall cost of ownership in the industry. It's also one of the reasons Dectron is the number one choice for discriminating engineers, contractors, owners and service technicians.

## Safeguard your dehumidifier

**WebSentry** delivers unparalleled value and peak performance for the lifetime of your dehumidifier and is included with every unit we build!

- 24-7 Remote Monitoring
- Remote System Control
- Performance Trouble Alerts
- Maintenance Reminders

### WEBSENTRY ADVANTAGES

- Real peace of mind – 24/7 dehumidifier monitoring for life
- Robust online reporting of real-time performance data
- A standard feature on every Dectron unit
- Simple plug and play Ethernet connection
- Optional WiFi and cellular connections available
- Works in parallel with BACnet, LonWorks and Modbus
- Secure access and control via computer, tablet or smart phone
- Connection activates premium extended 1<sup>st</sup> year labor warranty.
  - Allows remote assisted unit start-up
  - Authorized technicians fine tune unit performance remotely.
  - Real-time monitoring of all sensors including refrigeration pressures.
- Historical operating data logs on Dectron servers
- Remote access and control for authorized service personnel

### WEBSENTRY EXTENDED WARRANTY

One of the most important factors in assuring a lifetime of service and reliability with sophisticated dehumidification equipment is expert installation, start-up and commissioning.

When your installing contractor takes advantage of Dectron's factory-assisted startup with our WebCheck™ monitoring, you'll have 90-days of intensive remote factory monitoring to ensure your system is providing peak performance.

When **WebSentry** is connected at start-up, we automatically provide you and your contractor with a premium, one-year extended labor warranty. *(Conditions apply, see Warranty Statement for details)*

### WEBSENTRY MONITORING

- Performance analysis using sophisticated computer algorithms
- Performance logging and analysis reports by email
- Scheduled service and maintenance reminders by email
- Alarm service with automated emails to registered emergency service contacts
